Coronavirus Research at Royal Holloway

Academics at universities across the world are undertaking critical research to help us understand the current coronavirus pandemic. Royal Holloway is no exception—read about how our academics are contributing to the global effort below.

Top tip for year 12 students: If any of these stories or studies interest you, why not read about them and research them in further detail. Think about how they may relate to your future plans to study at university—you could even write about these topics on your personal statement.

**Biological Sciences**

Professor Pankaj Sharma is playing an instrumental part in the first UK clinical trials of a [nasal spray](#) proven to kill 99.9% of the coronavirus that causes Covid-19.
