

Sustainable cities are accessible, green–blue and fair

Professor David Simon

Activity Sheet

1. Download the annual UN Sustainable Development Goals Reports from <https://unstats.un.org/sdgs/report/xxxx/> - inserting each year from 2016 onwards in turn for xxxx. Compare the successive annual SDG11 reports in them, and discuss and/or summarise in writing what sense of progress against different targets and indicators is evident. This should be both at a global level and by continental region.
2. For your town or city (or local district or borough council), on the basis of your own personal knowledge and whatever data you can obtain from the local authority and other relevant websites, how sustainable do you think it is overall and in terms of the key dimensions discussed in this lecture?

Both these activities can be done individually or in small groups.
