

## MEng Electronic Engineering with a year in Industry (H6H1)

### September 2018 intake

The purpose of this information sheet is to provide prospective students and applicants with further information about the nature of this degree, in order to help you decide if it is the right choice for you. Should you have any further questions, contact information is provided at the end of the flyer.

### Section 1 – degree programme structure

Awarding institution	Royal Holloway
Accreditation(s) (where applicable)	Applied for Institution of Engineering and Technology (IET) accreditation but the visit can only happen when the 2 <sup>nd</sup> year cohort is in place. If the application is successful, it is expected that the 2017 cohort will be given accredited status on completion of the programme (accreditation application currently under review).
Standard length of degree	5 years

The following table summarises the compulsory modules, which Royal Holloway refers to as mandatory course units, offered on this degree programme each year:

Year 1						
Course unit name	Methods of teaching		Methods of assessment			Credits
	Contact hours	Self-study hours	Written exam	Present ation	Course-work	
Embedded systems team project 1	110	190	-	25	75	30
Programming in C++	55	95	-	-	100	15
PH1110: Mathematics for Scientists 1	69	81	80	-	20	15
Electronic circuits and components	55	95	60	-	40	15
Communications engineering 1	55	95	60	-	40	15
Principles of sustainable engineering	55	95	60	-	40	15
PH1120: Mathematics for Scientists 2	69	81	80	-	20	15
Year 2						
Course unit name	Methods of teaching		Methods of assessment			Credits
	Contact hours	Self-study hours	Written exam	Present ation	Course-work	
Embedded systems team project 2	110	190	-	25	75	30
Software engineering for electronics	55	95	-	30	70	15
Communications engineering 2	55	95	50	-	50	15
Electricity generation, transmission and distribution	55	95	50	30	20	15
Control engineering	55	95	50	-	50	15
Digital coding and data networking	55	95	50	-	50	15

Electronic materials and devices	55	95	50	30	20	15
----------------------------------	----	----	----	----	----	----

Year 3						
Course unit name	Methods of teaching		Methods of assessment			Credits
	Contact hours	Self-study hours	Written exam	Present ation	Course-work	
Individual Project	147	453	-	30	70	60
Signal Processing	49	101	50	-	50	15
Year 4 Year in Industry EE3001						
Year 5						
Course unit name	Methods of teaching		Methods of assessment			Credits
	Contact hours	Self-study hours	Written exam	Present ation	Course-work	
Group Project	119	481	-	15	85	60
Research Report	26	274	-	-	100	30

The fourth year of this degree programme will be spent on a work placement. Students are supported by their academic department and the Royal Holloway Careers Service to find a suitable placement. However, Royal Holloway cannot guarantee that all students who are accepted onto this degree programme will secure a placement, and the ultimate responsibility lies with the student. You will need to achieve an agreed level of academic performance to proceed onto, or remain on, a placement. For students on the Year in Industry programme EE3001 is mandatory non-condonable and must be passed to qualify for the degree title Year in Industry. This year forms an integral part of the degree programme and students will be asked to complete assessed work. The mark for this work will count towards the degree.

In addition to these mandatory course units, there will be a number of optional course units available during the course of your degree. The following table lists a selection of optional course units that are likely to be available. Please note that although the College will keep changes to a minimum, new units may be offered or existing units may be withdrawn, for example, in response to a change in staff. You will be informed if any significant changes need to be made.

Year 3(BEng)	Year 5 (MEng)
Course unit name	Course unit name
Renewable energy systems	Advanced wireless communications
Principles of engineering company management	Engineering leadership
Smart transportation	Electronics in advanced manufacturing
Voice and music technologies	Personal communications technology
Human factors and healthcare engineering	Imaging systems for medicine and industry
IY2760: Introduction to Information Security	App programming

As part of your degree programme you may be required to complete a course to develop your study skills, for example a course in academic writing skills. Courses such as these often do not carry credit but passing the course may be a requirement to progress to the next year of study.

## Section 2 – degree programme costs

H/EU tuition fee 2018/19*	£9,250
Overseas tuition fee 2018/19**	£17,500
Other essential costs	<p>There are no single associated costs greater than £50 per item on this course.</p> <p>Costs incurred by students while on a Year in Industry / Business will vary depending on the nature and location of the placement. For further information please contact the <a href="#">Department of Electronic Engineering</a>.</p>

The fee for the Year in Industry will be 20% of the tuition fee for that academic year.

\*The fees shown are for the 2017/18 academic year and are for reference purposes only. Current information available (October 2017) means that we expect the tuition fee for UK and EU undergraduates starting their degrees in 2018 to be £9,250. The UK Government has also announced that EU students starting an undergraduate or postgraduate taught degree in 2018/19 will pay the same level of fee as a UK student for the duration of their degree.

\*\* Fees for international students may increase year-on-year in line with the rate of inflation. Royal Holloway's policy is that any increases in fees will not exceed 5% for continuing students. There is a different tuition fee for a year spent abroad or working in industry. For further information on tuition fees please see [Royal Holloway's Terms & Conditions](#).

\*\*\*These estimated costs relate to studying this particular degree programme at Royal Holloway. General costs such as accommodation, food, books and other learning materials and printing etc., have not been included, but further information is available on our website.

## Section 3 – useful vocabulary

We understand some of the terminology used in this document may be new to you, and may differ from that used by other universities. To help with this, we have provided a brief description for some of the most important terminology:

*Degree programme* – Also referred to as 'degree course' or simply 'course', these terms refer to the qualification you will be awarded upon successful completion of your studies.

*Course unit* – Also referred to as 'module', this refers to the individual units you will study each year to complete your degree programme. Undergraduate degrees at Royal Holloway comprise four full units, or a combination of full (30 credit) and half (15 credit) units, to the value of 120 credits per year. Mandatory course units must be taken by every student on the relevant degree programme. Some of these mandatory course units must be passed for progression or a particular degree title. On some degree programmes a certain number of optional course units must be passed for a particular degree title.

*H/EU* – Different categories of students pay different levels of tuition fees. H/EU stands for students with Home or European Union fee status.

*Overseas* – Non-EU students are liable to pay the overseas rate of tuition fees, and are sometimes also referred to as international students.

#### **Section 4 – contact information**

If you have any further questions, you can contact the Admissions team by email at [study@royalholloway.ac.uk](mailto:study@royalholloway.ac.uk).

Please note that this information is final at the time of publication (26/02/2018) and supersedes any previous information provided in publications or on Royal Holloway's website.
